# UDM – CLEAR VISUALISATION FOR COMPLEX SYSTEM STATUSES

The Universal Display Module (UDM) is a powerful display unit for visualizing all measurement, status, and message states recorded by the fault annunciator gateway. It enables a clear, structured display of system states directly on site, thereby supporting rapid assessment of the operating status.
With freely configurable display pages and simple operation via haptic buttons, the UDM offers a practical solution for industrial applications where clarity, reliability, and ease of use are crucial.

With freely configurable display pages and simple operation via tactile buttons, the UDM offers a practical solution for industrial applications where clarity, reliability, and ease of use are crucial.

THE BENEFITS AT ONE GLANCE

☑ Flexible visualization of digital, analog, and temperature values on one or more pages with threshold value monitoring and alarms

☑ Quick visualization thanks to widget library and adjustable layout via software

☑ Numerous displays with identical or different visualization can be connected to USM and WAP-K devices

☑ Haptic buttons for easy operation even when wearing gloves

UDM5

Systembus Kabel max 10m

USM 40

TRANSPARENT DISPLAY OF MEASUREMENT VALUES AND STATUSES

☑ **Parameterisation of:**
- Page structure
- Layout
- Texts and labels
- Colors and display elements
- Widgets and display logic

☑ **Illustration of different application scenarios:**
- Compact status overview
- Detailed process visualisation
- Service and maintenance texts

☑ **Individual widget layout**
- Via drag and drop menu
- Via library and customizable grid array
- Up to 16 pages
- 3x4 grid default

FULLY EQUIPPED – OUR UDM STARTER KIT

The ultimate full package (ZUSMUDMSK1):

☑ USM 24 in 24V variant type 59UC11PFWRDO
- 2 x temperature inputs PT100/PT1000
- 4 x analog inputs
- 8 x relay outputs
- Port security with enhanced IT-Security configuration with 2 x LAN
- IEC 61850 / IEC 60870-5-104 / Modbus TCP

☑ UDM5 display in 24V variant type 59D0510UDM00
- including license for UDM software

50 years of EES – 50% discount! 1588€ instead of 3176€*

**Want to get started right away?
Just send an email to info@ees-online.de
with this flyer attached!**

* The offer is valid for one starter kit per company location and while stocks last. Valid until December 31st, 2026.
Prices are net prices ex works plus applicable VAT and are non-discountable. Our general terms and conditions apply.
